

Web Development using React — Assignment 1

Min Wu <minwu.training@gmail.com>

Please add the following three usability enhancements to the user registration project that we have done in class.

User Registration

The form consists of a text input field containing the name "Jason" and a button labeled "Add Name". A red arrow labeled "1" points from the "Add Name" button to the input field, indicating that the field should be cleared after a name is added.

Name List

- John✕
- Jack✕
- Jason✕

1. Once a name is added to the name list, the input field should be cleared.
2. The same name cannot be added to the name list multiple times.
3. Clicking the cross icon after each name removes the name from the name list.
